

# FILE ARMOUR

SHARE YOUR FILES SAFELY,  
ANONYMOUSLY AND ON THE FLY

### Problems with other File Sharing Solutions

- CORE FOCUS IS NOT SECURITY.
- FILE ENCRYPTION DONE ON CLOUD.
- ISSUES DUE TO PASSWORD SAVED IN DATABASE.
- POSSIBILITY OF INTERCEPTION.
- THREAT OF MALICIOUS INSIDER ATTACK.

## FILE SHARING PROBLEMS

### Interception of file at multiple points

Using email attachments for file transfer has several issues. Files can be intercepted at multiple points during its delivery or the email servers can get hacked. Thus sending files via emails is not a safe solution.

The core focus of most of the solutions is not security.

Many solution providers do not have a password protection on their free versions. The core focus of most of the solution is file size and the storage capacity rather than the file security. The companies that use file encryption, encrypt the file once uploaded to their cloud platforms. This creates three problems.

# 1

If a malfunction occurs during the encryption process, then the file may not be encrypted on their server.

# 2

Being that the file can be intercepted during transfer when the file is not encrypted.

# 3

The threat of a malicious insider or an attacker who has compromised the server. In both cases they will have access to the files as the password is saved in the database and it might not be encrypted.

## AN INTRODUCTION TO FILE ARMOUR

File Armour Ltd. is a security-centric startup founded by a team of experienced cyber security specialists. Our mission is to provide secure file sharing solutions for businesses and individuals who value the protection of their sensitive data. Our flagship product, also named File Armour, is designed to meet this need by using state-of-the-art encryption and authentication methods to ensure that only authorized parties have access to shared files.

Our secure core ensures that your files will not be intercepted, and in the event of a breach, our impact mitigation measures will minimize the impact. Additionally, our automatic and timed deletion feature ensures that your files will be deleted after a specified period, and our threat prevention measures help to prevent any potential security threats.

## SECURING YOUR DATA IN A DIGITAL WORLD

### SECURE CORE

Interception prevention

Insider threat prevention

Automatic & timed deletion

Risk mitigation

Periodic vulnerability scanning

# Unique Selling Proposition

## Why File Armour

Our process for file sharing is designed, keeping security, privacy and simplicity in mind. The idea is to make security, seamless and to make the interface very simple.

### Guaranteed Service Delivery

Guaranteed uninterrupted service delivery

1

### Simple to use

Only few clicks and you are ready to go. No registration for the Lite version

2

### Secure core

Secure core infrastructure for foolproof protection against data theft, fraudulent activities, & hacking attempts

3

### Customer Support

Confidence in using our product for your business needs. Dedicated to providing the best service and support for your business goals
